Art Unit: 1752

1. The finality of the last office action is withdrawn in order to make the following rejection with new art found in an updated search.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 2 and 15-19 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Toan et al. Toan et al. ( see particularly para. 1-32, 119, 304; examples B1-B7 ) disclose silver halide materials with uv absorbers within the scope of formula (I) of claim 2 when n1 and n2 are 0 . B1 can be triazine as disclosed in applicants' specification. Example B7 has a dinaphthyl triazine in a color silver halide element. R5 ( included in R3 and R1 ) in Toan et al may contain carboxyl. In regard to claim 15, it would at least be obvious to one skilled in the art to use the carboxyl containing R5 groups in R1 of Toan et al. Toan et al is the US application of a PCT application published as WO 03/035734 in English and has an effective filing date of 10-10-02.

Art Unit: 1752

3. Claims 15, 16, 18 and 19 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over EP 277509 for the same reasons as set forth in paragraph 2 of the last office action.

4. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yamashita et al. and EP 277509 for the same reasons as set forth in paragraph 1 of the last office action.

5. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Parton and Morigati et al. for the same reasons as set forth in paragraph 3 of the last office action.

6. Claims 15, 16, 18 and 19 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Morigati et al. for the same reasons as set forth in paragraph 4 of the last office action..

7. Claims 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over Yamashita et al. or Parton et al. both in view of Vargas and Merkel et al. for the same reasons as set forth in paragraph 5 of the last action.

8. Claims 15, 16, 18 and 19 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ikegawa et al. or Singer et al. for the same reasons as set forth in paragraph 6 of the last office action.

9. Claims 4, 8 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
